

+ summary

I am a curious, driven, and multi-talented programmer. I am pursuing a career in software development, which combines my love of problem solving, building, and creativity. My past experience and current interests translate to being accustomed to the importance of balance and hard work.

Any organization I have worked for has commended my leadership and dedication. I am constantly learning and growing; my current project, outside of learning full-stack development, is teaching myself Spanish. I am eager to work for a company that can take advantage of my willingness to grow, and sees my wide variety of skills as an asset.

+ projects

- Gneiss Rocks** Sep 2017 to Current
Consumed the Google Vision API to identify images of rocks and minerals. Stored user images in a public Google storage bucket. < Ruby / Rails / Google Vision API / Google Cloud SDK >
- Kickstarter Clone** Jul 2017 to Aug 2017
Worked with brown-field code to create a more accurate representation of Kickstarter. Implemented features like dynamic progress bars, and project filtering system. < Ruby / Rails / Google Maps API / Javascript >
- Cloney Island Travel** Jun 2017 to Jul 2017
Green-field rails project consuming the google places API. Created a dynamic map filtering system with API queries. Implemented a patch to solve a security issue. < Ruby / Rails / Google Places API / Javascript >
- Rales Engine** Jun 2017 to Jun 2017
Built a custom API from sales data imported from CSVs. Made advanced active record queries for business logic. < Ruby / Rails / SQL / Active Record >

+ employment

- Recruit Sumo** Boulder, CO
Marketing and Software Intern
Sep 2016 to May 2017
Identified social media marketing strategies. Participated in community events to help promote the company. Learned junior level python with intention to help with the code base in the future.
- Liberty Puzzles** Boulder, CO
Sales Associate
Aug 2016 to Mar 2017
I handle monetary transactions, educate customers about puzzles, open and close the store, and act as occasional support in the factory.
- Atlas Demos** Boulder, CO
Regional Client Recruiter
Aug 2016 to Mar 2016
I provided invaluable research on potential and existing clients as well as the competitive landscape. I was the top client recruiter which lead to consistent business. I managed and followed up on digital marketing campaigns. I monitored news and developments relating to, or impacting, key clients/prospects. I prepared periodic prospect, opportunity, and client reports.

+ education

- 2017 Turing School of Software and Design Backend Engineering**
Seven month intensive software development program focused on back end engineering, particularly with Rails. Built web applications to fulfill project requirements. Program requirements include mastery in Ruby on Rails applications built from Test Driven Development, comfort in consuming and building custom APIs, and focus on some front end skills such as Javascript.
- 2015 University of Colorado, Boulder Bachelors Geophysics**
Studied geology with geophysics emphasis. Focused on ground water remediation and hydrology.
- 2015 University of Colorado, Boulder Certificate Business**
Month long intensive course to dive into the world of marketing in the Leed's School of Business. Won first place for my team's business model. Was recognized for my leadership and drive.
